Academic Details

- **Master Of Computer Application**
Abasaheb Garware College, Pune;
CGPA: 8.20
(2022-2024)
- **Bachelor Computer Science**
Nowrosjee Wadia College, Pune;
CGPA: 7.15
(2018-2021)

Soft Skills

Analytical | Collaborator | Leader | Problem Solving

Technical Skills

- **Programming Languages:**
JavaScript, Python, java(core)
- **Frameworks:**
React, Express, Django

Core Competencies

- **Front-End Development:**
HTML, CSS, JavaScript, React
- **Back-End Development:**
Node.js, Express
- **Database Management:**
MongoDB
- **Programming Languages:**
JavaScript, TypeScript, Python
- **Web Architecture:** MVC, Microservices
- **API Development and Testing:** RESTful APIs, Postman
- **Version Control:** Git, GitHub

Profile Summary

Enthusiastic and detail-oriented Software Developer with a solid foundation in both front-end and back-end technologies, including HTML, CSS, JavaScript, and frameworks like React and Express. Skilled in server-side development with Node.js and proficient in database management using MongoDB. Passionate about coding and problem-solving, I am committed to continuously learning new technologies and enhancing my skills. Ready to contribute to a collaborative team and deliver high-quality software solutions that optimize performance and user experience.

Work Experience

Software Developer Intern
Foxmula by Expertrons, Pune
02/2024 – 08/2024

Responsibilities:

- Worked on back-end development with Node.js and Express to support front-end requests.
- Contributed to database management and query optimization using MongoDB.
- Participated in team meetings to discuss project requirements and progress.
- Helped in debugging and resolving issues reported by users and testers.

Achievements:

- **Mastered MVC Architecture:** Successfully implemented the Model-View-Controller (MVC) architecture in multiple web development projects, ensuring a clean separation of concerns, enhanced code maintainability, and scalability of applications.
- **AI-Powered Question Generation and Image Generation Models:** Developed two AI-based models using OpenAI and Node.js. The first model generated multiple choice and single-line answer questions, while the second utilized DALL·E and JavaScript to create AI-generated images. Both models enhanced automation and user interaction within the application.
- **API Testing with Postman:** Conducted comprehensive API testing and documentation using Postman, ensuring the reliability and functionality of RESTful services. Created automated test scripts to validate API endpoints, significantly reducing manual testing efforts.

Academic Projects

Chat-Application:

Tools: React, Node, Express, MongoDB, Socket.io

Roles: Full-Stack web application

PROJECT DESCRIPTION : A MERN stack-based ChatGPT clone that leverages MongoDB, Express.js, React, and Node.js to create an interactive AI chatbot application capable of understanding and generating human-like text responses.

Tour Management System:

Tools: React, Node, Express, MongoDB

Roles: Full-Stack web application

PROJECT DESCRIPTION : Tourism Management System is an integrated software developed for tourism business. It is a dynamic and responsive system and it addresses the challenges of managing the records, missing records due to human errors, etc. The purpose is to build a system that performs all operations related to traveling, booking, sightseeing, etc.

YouTube-UI-Clone:

Tools: React, Node, Express, MongoDB

Roles: Full-Stack web application

PROJECT DESCRIPTION : Developed a full-featured YouTube clone using the MERN stack (MongoDB, Express.js, React, Node.js). a responsive UI. Leveraged RESTful APIs to handle video data and user interactions efficiently. Ensured scalability and performance optimization. Conducted thorough testing and debugging to deliver a seamless user experience.

Bookstore Application:

Tools: React, Node, Express, MongoDB

Roles: Full-Stack web application

PROJECT DESCRIPTION : Developed a comprehensive bookstore application featuring a book browsing and purchasing system using the MERN stack (MongoDB, Express.js, React, Node.js). Integrated user authentication. Implemented password reset functionality through mobile OTP and email links. Designed a responsive and user-friendly interface for seamless navigation across book pages and service pages. Leveraged RESTful APIs to manage book inventory, user data, and transactions efficiently. Ensured robust security measures and optimized performance for a smooth user experience.

ChatGPT-UI-Clone:

Tools: React, Node, Typescript, MongoDB

Roles: Full-Stack web application, Deployment

PROJECT DESCRIPTION : ChatGPT Clone: A Full-Stack Conversational AI Platform powered by React and OpenAI's GPT 3.5 Model

Flipkart-UI-Clone:

Tools: React, Node, Express, MongoDB

Roles: Full-Stack web application

PROJECT DESCRIPTION: Flipkart Clone is a remarkable multi-vendor eCommerce script that allows Entrepreneurs to build their own multi-vendor eCommerce websites similar to Amazon Flipkart.

Gemini-UI-Clone:

Tools: React, Node, Express, MongoDB

Roles: Full-Stack web application

PROJECT DESCRIPTION: Gemini Chatbot Clone - your personal AI companion for engaging conversations! With advanced natural language processing, Gemini understands and responds to your queries, provides helpful information, and even keeps you entertained with witty banter. Experience the future of AI-driven conversation today

IMDB-UI-Clone:

Tools: React, Node, Express, MongoDB

Roles: Full-Stack web application

PROJECT DESCRIPTION: IMDb-inspired platform, our site offers a comprehensive database of films, TV shows, and entertainment industry information. Users can explore, rate, and review their favorite movies and shows, while staying updated on the latest releases and industry news
